**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to an immunobead-flow cytometry assay, classified in class 435, subclass 4.
  - II. Claims 6-11, drawn to a kit for a fluorescent immunobead assay, classified in class 435, subclass 975.
  - III. Claim 12, drawn to a no wash fluorescent immunobead assay, classified in class 435, subclass 7.1.
  - IV. Claims 13-14, drawn to a no wash detection method, classified in class 436, subclass 518.
  - V. Claim 15, drawn to a no wash assay, classified in class 435, subclass 7.9.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the method of Group I differs in function from Groups II-V, as it is drawn to an immunobead-flow cytometry assay for simultaneously detecting a plurality of antigens or antibodies. The kit of Group II, unlike the other methods, is drawn to the detection of one or more specific antinuclear antibodies, and requires at least two antigens selected from Anti-RNP, Anti-Sm, Anti-SS-A (Ro) antigen, SS-B (La), Anti-Scl-70, and anti-dsDNA. The method of Group III differs from Groups I and II since it is drawn to a no-wash assay. In addition, the steps required in the method of

Group III differ from the other methods. Group IV differs from the other groups because it is drawn to a no-wash detection method with steps and components that differ from the other groups. Finally, Group V is patentably distinct from Groups I-IV because it is drawn to a no wash assay with the first step of the process being the washing of beads.

3. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and the search required for one group is not required of the others, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Colin Abrahams on 9/7/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
